

PATTERN

Crochet Christmas Wreath Pattern

A ring of joined granny-square motifs in holiday colors, finished with a crocheted bow — no wire frame required.

Updated 2026 • US terms • 2 hr read

This wreath is built from a ring of small granny-square-style motifs joined edge to edge, so it holds its round shape without any wire or foam base underneath. If you haven't made a granny square before, our [granny square tutorial](#) walks through the basic motif this pattern is built from.

What you need

- Worsted weight (#4) yarn: green (main), red (motif centers and bow), plus a small amount of a second green for variety if you like
- 4.5mm hook
- Yarn needle
- Stitch markers

Motifs (make 8)

Steps

1. Using red, magic ring, chain 3 (counts as first dc), 2 dc, chain 2, *3 dc, chain 2* 3 more times into the ring. Join with a slip stitch to the top of the starting chain. Fasten off red.
2. Join green in any chain-2 corner space. Chain 3, 2 dc, chain 2, 3 dc in the same space (first corner made). *In the next corner space work 3 dc, chain 2, 3 dc.* Repeat around all 4 corners.
3. Join with a slip stitch, fasten off, weave in ends. This makes one square motif; repeat 7 more times for 8 total.

Joining into a ring

Steps

1. Arrange the 8 motifs in a circle, each one touching its neighbors along one edge.
2. Using a whip stitch or slip-stitch seam, join each motif to the next along the touching edge, working all the way around until the ring closes.

Bow and hanging loop

Steps

1. Bow: chain 20, work 1 row of dc back across, fasten off. Make a second, shorter strip (chain 12) the same way for the bow's center wrap. Gather the longer strip in the middle to form a bow shape, then wrap the shorter strip around the center and stitch it closed.

2. Stitch the finished bow to the bottom of the wreath, over the join between two motifs.
3. For the hanging loop, chain 10–12 at the top of the wreath, slip stitch to form a loop, fasten off.

Frequently asked questions

Do I need a foam or wire wreath form?

No — joining the motifs into a ring gives the wreath its shape on its own, though you can stitch it to a form if you want extra rigidity.

Can I use more or fewer motifs?

Yes — more, smaller motifs make a larger wreath with a bigger center opening; fewer, larger motifs make a denser, smaller wreath.

What if my ring doesn't lie flat?

Block the joined ring by pinning it to a round shape while slightly damp and letting it dry — this evens out any puckering at the joins.
