 Crochet notions and thread for finishing a toddler beanie

GAUGE

14 sc and 16 rows measures about 4in / 10cm square with a 5.0mm hook and worsted yarn. Fit depends more on gauge at this size than in an adult beanie — measure the toddler's head before starting if possible.

NOTES

- Written in US terms, worked in a continuous spiral — use a stitch marker to track round starts, same as our [adult beanie pattern](#).
- Toddler head sizes vary more than adult sizes. Measure and compare against the crown circle before starting the straight rounds if an exact fit

matters.

- This pattern stops crown increases at round 6 (adult version continues to round 8), which is the main difference between the two sizes.

Frequently asked questions

How do I scale an adult beanie pattern down for a toddler?

Stop the crown increase rounds two rounds earlier than an adult version, and work fewer straight rounds for the body, checking the flat crown circle against the toddler's head measurement as you go.

What head size does this toddler beanie fit?

This pattern is sized for an average 1 to 3 year old head circumference, roughly 18 to 19 inches. Measure the toddler's head for the most accurate fit, since sizes vary.

Is single crochet fabric warm enough for a toddler beanie?

Yes, single crochet produces a dense, tightly-worked fabric that blocks wind well. For extra warmth in very cold climates, a wool or wool-blend yarn adds insulation that acrylic doesn't provide.
